In person COVID-19 Screening Flowchart
Intended for use in non-medical worksites when employees first arrive at work

New precautionary measures are needed to help protect the health and safety of our employees from the spread of the new global coronavirus pandemic. We appreciate your understanding and support.

Has the person been tested for COVID-19 and / or exposed*?

- NO
  - Does the person have symptoms of:
    1. FEVER of 100.4 F or higher (subjective or objective) OR
    2. NEW ONSET COUGH OR
    3. NEW ONSET SHORTNESS OF BREATH

  - YES: Refer patient to their PCP or online urgent care.
    - If no other option COVID-19 phone line 855-851-3641

  - YES: Positive or pending result

- YES: Negative result

  - Since the test, have you developed
    1. FEVER of 100.4 F or higher (subjective or objective) OR
    2. NEW ONSET COUGH OR
    3. NEW ONSET SHORTNESS OF BREATH

  - NO

- YES

Employees should be screened for symptoms and exposure. If positive, they should not enter the building and they should contact their primary care provider.

All employees should maintain a 6-foot distance between persons and wear face mask/covering

Advise home isolation until all three criteria are met:
- At least 3 days (72 hours) have passed since recovery defined as resolution of fever without the use of fever-reducing medications AND
- Improvement in respiratory symptoms (e.g., cough, shortness of breath); AND,
- At least 7 days have passed since symptoms first appeared

Person can enter facility with a cloth face covering or mask

COVID-19 Assessment of Employees Arriving at Work
Effective 4/20/2020
